

HousingASAP Fact Sheet

Homeless families rely on dedicated, results-driven organizations in our community for help with housing, employment, case management, and health care. Family homeless service providers and their committed leaders need and deserve our support. Through the HousingASAP program, a network of providers receives help with capacity building, data practices, program development, leadership coaching, and collaboration. These resources are developing stronger organizations with forward-thinking leadership to improve outcomes for homeless families.

HousingASAP Goal

To build a statewide network of homeless service providers who will move more homeless families into stable housing faster and help them stay there.

HousingASAP focuses on four primary strategies to achieve its goal:

- 1 Form a network that will collaborate, coordinate, and share information with each other.
- 2 Improve organizational adaptability and leadership.
- 3 Enhance their performance by using data to make decisions and show achievement.
- 4 Better equip organizations with skills to influence policy and funding changes.

Results in 2016

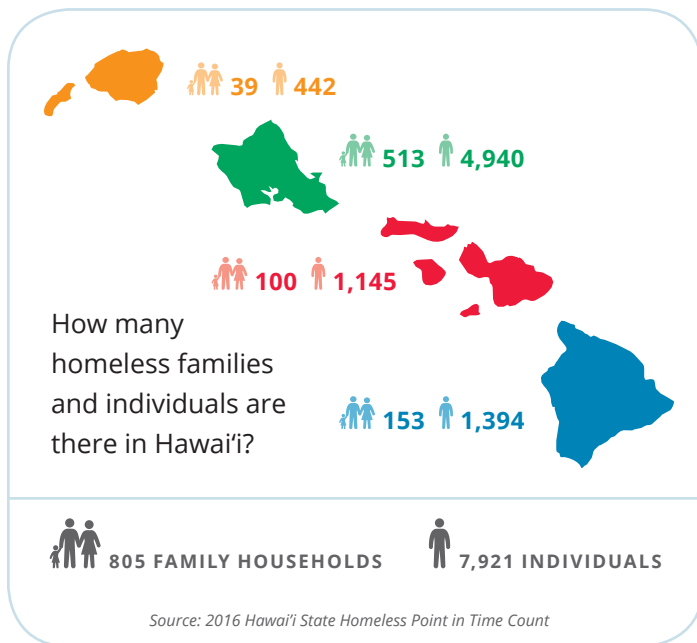

In 2016, HousingASAP network organizations placed **238** families into permanent housing — in total, **653** families were placed into permanent housing since 2014.

HousingASAP network members' emergency shelters moved homeless families into permanent housing **24%** faster and reduced the average number of days in shelters from **166** to **126** days. Network organizations' transitional shelters reduced stays by **9%**.

Current Situation

HousingASAP Strives for Impact

The network's impact on family homelessness in Hawai'i will be demonstrated in four concrete outcomes:

- Increase the number of families placed in stable housing.
- Reduce the time required to place families in stable housing.
- Increase the number of families who remain in stable housing.
- Develop a network of change agents and increase collaboration among organizations and providers serving homeless families.
